Congrats Card

Tips and Suggested Use:

- **Print and cut along lines.**
- Students can periodically check bins and give feedback using Congrats Cards.
- Use the cards to help improve recycling in classrooms, offices, break rooms, etc.
- Remind students: when giving feedback on what they find in the recycling bin, identify incorrect items but keep it positive to encourage participants to recycle!
- Congrats Cards can be used with the Oops cards and/or a Waste Audit as a student activity.
- Consider having a schoolwide contest focusing on classroom recycling bins; announce the winners weekly—classrooms that had only correct items in the bin for the week.
- Have students record results of the audit to track improvements over time, then share these results with the individual classrooms/offices and your school community. This is a great way to encourage and increase recycling participation. Be sure to keep it positive!
- Take photos of students monitoring bins, giving feedback, and implementing any program changes for your school's Maryland Green School application.
