DEPARTMENT OF CAPITAL PROGRAMS
PRINCE GEORGE'S COUNTY PUBLIC SCHOOLS

DuVal High School
Stadium Project Update Meeting | July 29, 2026
Questions & Answers

Is there a plan to include outdoor restrooms for this new facility?

As of right now, no, we do not have any restrooms included in our scope.

Has there been any assessment to ensure that the field is complying when it comes to members of our community who have disabilities?

We will be redeveloping the entire ADA access in and out of the stadium. There will be a brand-new ADA ramp with landings and handrails on both sides.

We also have ADA accessibility from the bottom of the ramps all the way over to the bleachers. The bleachers are also equipped with ADA ramps, so wheelchairs can be wheeled all the way up and use the grandstands with the rest of the community. There is also ADA access all the way out onto the track and field as well. We plan for this to be as multi-use and multi-purpose as possible.

Will there be any changes to the tennis courts?

The tennis courts are not currently included in the scope.

During the 3rd and 4th semesters, the AFJOTC program was not permitted to use the field for physical fitness during the school day. Will that restriction be lifted in the fall?

Because of what we are trying to do to maintain the field throughout the season, it will not be used for anything other than games played during the season. For example, if the football team has a game, they will play on the field. The fall teams that play during that year will be able to use the field. So that's soccer, football, and flag football. They will be using the field only for the purpose of games. Everyone else will be using other fields for practice.

How will the parking lot be impacted during this project?

There will be a small section taken up by LDD. These areas will be addressed during our pre-construction meeting with them before we kick off construction. Our goal is to make the most minimal impact on the students and staff.

In terms of the permanent situation, there won't be any additional impact on the parking lot that will reduce any parking from what's there now. The current ticket booth is stationed in the parking lot, taking up space or two. We're going to be keeping the entrance with an addition for new security screening devices to be stationed at the entrance.
