

DUVAL HIGH SCHOOL

ATHLETIC STADIUM RENOVATION

PROJECT OVERVIEW

Prince George's County Public Schools is advancing a phased renovation of DuVal High School's stadium and athletic facilities. The project includes a new synthetic turf field with upgraded drainage, a rebuilt regulation-size track, updated field event areas, new bleachers, and an updated press box. Accessible walkways and ramps, concrete steps with handrails, and accessibility upgrades to spectator facilities will support access throughout the site.

New perimeter fencing, gates, field enclosures, and egress lighting will strengthen site security and support safe circulation. Additional upgrades include Musco stadium lighting with theatrical capabilities, stadium and baseball scoreboards, baseball and softball batting tunnels, and replacement backstops and fencing. A new ticket booth, storage building, flagpoles, and utility and stormwater improvements will support athletic programs and daily operations. The completed project will provide safer, more reliable playing conditions, improve accessibility, and enhance security.

CONSTRUCTION UPDATE

Athletic activities are expected to continue during Phase 2, including track and field practice on the field. The bleacher construction area will be fenced off from November 2026 through February 2027. PGCPS is coordinating construction with school leadership and the athletic director.
